PABLO MORENO

FREELANCE DEVELOPER · FULLSTACK & MOBILE

pablomoreno44@gmail.com · linkedin.com/in/pablo-moreno-develop · github.com/loperita · loperita.github.io/portafolio/en · Remote · Colombia (GMT-5)
Languages: Spanish (native) · English (intermediate, B1)

I design and build **custom websites and apps** — front end, back end and mobile — with clean, tested code that grows with you. One point of contact from start to finish.

Services

Custom web development — from landing page to web app. **From USD 240**

Mobile apps — one Android + iOS app built with Flutter. **From USD 910**

Performance optimization — a faster website or app, with metrics. **From USD 105**

Converted from COP at Colombia's official exchange rate (TRM).

Why work with me

- **One point of contact** for front end, back end and mobile: less coordination, lower costs.
- **Maintainable, tested code**: your project never becomes a black box.
- **Plain-language updates**: you always know where things stand and why.
- **Business first**: I solve the problem, not just write code.

Featured projects

Knife Poker — Texas Hold'em analysis

Mobile app with its own poker engine: real odds via Monte Carlo and a call/fold decision. Built in Flutter, then rewritten natively in Kotlin, adding range charts and offline news. 116 automated tests.

`Kotlin · Jetpack Compose · Flutter · Dart · Monte Carlo`

Katuq — Courier app

Optimized geolocation and routing, integrated Waze/Google Maps, redesigned the UI and added performance tracking. Used by 8 large companies and 15+ small businesses.

`Flutter · Dart · Waze · Google Maps`

Katuq — Merchant integration

Integrated Siigo invoicing into the platform and worked on the site's user interface: everything in a single ecosystem.

`Angular · Node.js · Express · Firebase · Siigo`

Tech stack

FRONTEND

React · Angular · JavaScript · HTML · CSS

BACKEND

Java · Spring Boot · Node.js · Express · Python · SQL

MOBILE

Flutter · Dart · Kotlin · Jetpack Compose

INFRA & TOOLS

Firebase · Git · GitHub · AWS (learning)

How I work

01 — Discovery
A short call to understand your goal. Free.

02 — Proposal
Scope, deliverables, timeline and price, in writing.

03 — Development
I build in blocks you can see and test.

04 — Launch
A working product, documented and explained.

05 — Support
Ongoing help for tweaks and growth.
